PREFACE

HYPERLINK FEATURE

The digital version of this report has been hyperlinked. Click on the title of a section or a table in the List of Tables and you will be automatically directed to the actual content section or table in the report.

This report provides the detailed results provided by teachers, administrators, and other school staff on each question in your 2017-18 administration of the *California School Staff Survey* (CSSS), presented in tables organized by topic.

The CSSS, along with its companion student and parent surveys—the *California Healthy Kids Survey* (CHKS) and the *California School Parent Survey* (CSPS)—is a service of the California Department of Education (CDE). These three surveys form the *California School Climate, Health, and Learning Surveys* (CalSCHLS) System (see cal-schls.wested.org). CalSCHLS is the largest, most comprehensive effort in the nation to regularly assess students, staff, and parents at the local level to provide key data on school climate and safety, learning supports and barriers, and stakeholder engagement, as well as youth development, health, and well-being. Exhibit 1 presents the major school-related domains and constructs assessed by CalSCHLS.

These surveys grew out of CDE’s commitment to helping schools promote the successful cognitive, social, and emotional development of all students; create more positive, engaging school environments for students, staff, and parents; and ensure college and career readiness. They provide a wealth of information to guide school improvement and **Local Control and Accountability Plan** (LCAP) efforts, particularly in regard to the state priorities of enhancing school climate, pupil engagement, and parent involvement (download *Helpful Resources for Local Control and Accountability Plans*). For additional information and resources, visit the survey websites: csss.wested.org and cal-schls.wested.org.

Factsheets, guidebooks, and other resources to help in understanding and using CalSCHLS results are available for downloading from the survey websites. The California Safe and Supportive Schools website provides information and tools helpful in implementing effective strategies to address the needs identified by the survey (californiaS3.wested.org).

The CalSCHLS Technical Assistance Center offers a Data Workshop to help identify local needs and develop action plans to meet those needs, including a *Listening to Students Workshop* for involving student voice in the process (see below).

SURVEY PURPOSE

The CSSS was developed for CDE in 2004 to fulfill the requirement in the *No Child Left Behind Act* of 2001, Title IV, that schools conduct an anonymous teacher survey related to student drug use and violence. Recognizing the opportunity this requirement presented, CDE expanded the content to collect other data to guide school improvement efforts and to meet LCAP state priorities. Schools can also add questions of their own choosing to meet other local data needs. Because the results are anonymous and confidential, the survey provides staff with an opportunity to honestly communicate their perceptions about the school.

The CSSS grew out of CDE’s commitment to: (1) helping schools promote the successful cognitive, social, emotional, and physical development of all students; and (2) fostering positive school working

environments, particularly to help address the growing problem of low teacher retention. This CSSS report provides data on the degree to which staff perceive that their school has a learning and working environment that is safe, supportive, caring, collegial, challenging, and engaging, with norms and standards that encourage academic success. CSSS data enrich a school's ability to create a positive school climate that promotes quality teaching, school connectedness, academic achievement, and overall well-being among both students and staff.

SURVEY ADMINISTRATION AND SAMPLE

Schools are provided with detailed survey planning and administration instructions. CDE guidelines call for the CSSS to be administered online at the same time as the CHKS, among all staff in grades 5 and above.¹ Staff participation is totally voluntary, anonymous, and confidential. The tables in the Survey Sample and Demographics sections of this report provide the numbers of respondents who completed the core module; their roles at the school (e.g., teacher, administrator, counselor); the length of their employment at the school and in their positions; and their races/ethnicities. The number of respondents who completed each additional module is also provided at the beginning of the set of tables for that module.

SURVEY CONTENT OVERVIEW

The survey questions were selected with the assistance of an advisory committee to assess the key school climate variables that research and theory indicated are most associated with successful learning and teaching. Like most school climate surveys, it focuses on individual behaviors, patterns of communication and interactions, and professional and student supports.

Core Survey (Section A)

All staff answer the questions in the first part of the survey, which provides background information about the characteristics of the staff respondents who completed the survey and assesses the following main domains:

- How **supportive and inviting** the learning and working environment is in general;
- School **norms and standards** that promote achievement, including the rigor and relevance of instruction, and a shared sense of responsibility for school improvement;
- **Staff supports, professional respect, and collegiality** within the working environment, factors that surveys of California teachers have shown to be key to teacher retention;
- Staff and student **safety**;
- **Student developmental supports** in the school environment—caring staff/student relationships, high expectations, and opportunities for meaningful participation and decision-making—that resilience research has linked to school and life success;
- **Equity**, respect, and cultural sensitivity, which are particularly germane for closing the achievement gap;
- Student **behaviors that facilitate learning**, including the degree to which students are ready and motivated to learn and are well-behaved;

¹ In some instances, the survey is administered on paper.

- The level of **problems the school experiences** that are related to fourteen student behaviors or conditions (e.g., truancy, violence, bullying, substance use, mental health, and physical health);
- The nature, communication, and enforcement of rules and policies related to **discipline**; and
- Staff professional development needs.

The same questions asked of students in the CHKS School Climate Module are included in the CSSS so that staff and student results can be compared. These results are reported in Section 6 (Learning Conditions). The questions provide additional data on five key constructs:

- Supports for Learning;
- Discipline and Order;
- Social, Emotional, and Behavioral Supports;
- Positive Peer Relationships (anti-bullying related); and
- Respect for Diversity.

Learning Supports Module

The **Learning Supports Module** is designed to be answered only by staff who provide services or instruction related to health, prevention, discipline, safety, or counseling. These questions assess a school’s programs, policies, supports, and services that address nonacademic barriers to learning and promote healthy youth development. The results can be compared to the level of student need as indicated by staff perceptions of problems (from the first section of the CSSS) and student report (from the CHKS).

Supplemental Modules

In addition, two supplementary modules are available that districts can elect to add to the survey. For information, call the toll-free CalSCHLS Helpline at 888.841.7536.

- The **Special Education Supports Module** consists of 12 questions designed to be answered only by staff who have responsibilities for teaching or providing related support services to students with Individualized Education Programs (IEPs). It provides data to better understand issues involving (1) effectively meeting the needs of students with IEPs, and (2) recruiting and retaining special education staff. Districts can request custom reports that compare CSSS results reported by staff who have special education responsibilities to those reported by other staff.
- The **Military Connected Schools Module** allows schools to gather the views of staff about their schools related to the educational and other needs of students who have parents connected to the military, in order to foster more military-friendly and supportive school climates.

THE REPORT

Results are provided in tables with data from all school levels assessed presented separately. The usual school levels are elementary (grades 1–6), middle (grades 7–8), high (grades 9–12), and nontraditional (ungraded, such as continuation high schools with 16 years being the earliest age of admittance).

The tables are organized into topical sections, as outlined in the Table of Contents. They provide the percentages of staff responding to each response option for each question. Percentages are rounded off to the nearest whole number. Summary tables at the beginning of the sections provide a quick overview to key indicators, with a reference to the table where the detailed results can be found.

Supplemental Reports

On request, custom reports can be prepared that disaggregate the survey data and compare the results based on the characteristics of respondents (e.g., race/ethnicity), job responsibilities (e.g., special education compared to general education staff), or based on how staff responded to a particular question (e.g., whether they agreed or disagreed that the school had a supportive and inviting learning environment).

UNDERSTANDING THE DATA

Among the tools available to help in understanding and using the survey results, especially for LCAP implementation and monitoring, *Making Sense of School Climate* provides a discussion of all the CalSCHLS survey items that relate to school climate (download californias3.wested.org/resources/S3_schoolclimateguidebook_final.pdf). You can also request a custom Data Workshop (see Next Steps below).

Care must be taken to fully understand the survey; the context within which the data were collected; and the factors that can impact the quality, validity, and generalizability of the results. The following are a few of the key issues that should be kept in mind.

Representativeness

Among the most important factors affecting the quality of survey results is the level of staff participation. The validity and representativeness of the results will be adversely affected if the staff response rate is lower than 70%. One indication of the survey's representativeness is how accurately the characteristics of the sample (see Section 3) reflect the characteristics of the staff as indicated by personnel records. Even if the response rate is low, the results provide an indication of what those staff who did respond felt about the school and their experiences and behavior. Strategies for increasing participation are discussed below.

Changes Between Surveys

Many factors besides real changes in behavior, attitudes, or experiences among staff may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or size of the sample of staff who completed the survey, changes in the questions themselves, or differences between time periods in which the survey was administered.

Data Comparisons

Comparing results to other district, county, and state data provides a broader context with which to assess the local situation. This can help you determine whether local changes are unique or may be part of a broader trend. Ultimately, however, the most fundamental concern should be what the survey results say about your schools and what improvements need to be made. Results from all districts in the state that conducted the CSSS may be downloaded from the CSSS website: csss.wested.org/reports.

IMPROVING PARTICIPATION

One of the most important strategies for improving voluntary staff participation is raising awareness among staff of the value of the survey to the school and the value of staff perceptions to school improvement efforts. To that end, it is important that staff are informed about the results and any school improvement efforts that are undertaken in response. Staff must perceive that their voices are heard and valued.

RESOURCES

The CalSCHLS system contains numerous guidebooks and other resources for using and understanding survey results.

- *CHKS Guidebook to Data Use and Dissemination* provides step-by-step instructions on how to interpret survey results and effectively disseminate them (download chks.wested.org/resources/chks_guidebook_3_datause.pdf).
- CHKS and CSSS **factsheets** analyze key topics at the state level, show how data variables are related, and offer suggestions for how data can be analyzed at the local level.
- *Making Sense of School Climate* provides a discussion of all the CalSCHLS survey items that relate to school climate (download californias3.wested.org/resources/S3_school_climateguidebook_final.pdf).
- *Helpful Resources for Local Control and Accountability Plans* (chks.wested.org/resources/LCAP_Cal_SCHLS.pdf) describes how survey items align with LCAP priorities and indicators. Also available is an LCAP-related PowerPoint presentation (chks.wested.org/training-support/workshops-presentations).
- The *School Climate Connection Newsletter* provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on the CHKS or CaliforniaS3 websites.
- CDE's **California Safe and Supportive Schools** website (californiaS3.wested.org) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.

NEXT STEPS

Receiving this report is a beginning step in the process of using data to improve school climate. The following describes further actions that you can take. This includes custom services that can be provided by the staff of the CalSCHLS Technical Assistance Center.

Request School Reports

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school (a fee applies).

Compare with Other Data Sources

CSSS results will be enriched if analyzed in the context of data from the CHKS, CSPS, and other sources, particularly in the context of identifying consistent patterns or disconnects that need further exploration. Other data typically collected in effectiveness studies of school climate include numbers and kinds of discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.

Engage Students, Staff, and Parents in Reviewing the Results and Action Planning

Discuss the results with students, staff, and parents to explore the meaning of the results in more depth, identify needs, and to obtain their input into how the school might better meet the needs identified. This is especially important because it communicates to staff that you value their input, and it may help improve participation in the next survey. CalSCHLS staff can provide information on conducting structured **Listening to Students Workshops** designed to explore with students, with staff and parent observers, the meaning of survey results and obtain their input on how to address the needs identified by the survey.

To assist in your review of the survey results, you can request the CalSCHLS TA Center to conduct a customized Data Workshop. In this workshop, a survey specialist works with district stakeholders to promote better understanding of the results and to identify local needs that need to be addressed. The workshops can also include engaging stakeholders in developing a detailed Action Plan and timetable for meeting those needs using evidence-based strategies. Ongoing coaching in implementing the plan is also available.

Conduct Additional Analyses of Dataset

The complete dataset is available electronically for additional analysis (there is a small fee for preparation). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different subgroups of staff and across schools within a district. You can also request an analysis by CalSCHLS staff as a custom service.

Add Questions to Your Next Surveys

Determine what additional information is needed from staff to guide school improvement efforts and add questions to your next CSSS or CHKS. Both surveys were designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

For more information about workshops and technical assistance available from the CalSCHLS TA Center in understanding survey results and developing effective action plans to address identified needs, call the survey helpline (888.841.7536) or email schoolclimate@wested.org.

Disagree	13
Strongly disagree	0

Question A.21: This school emphasizes using instructional materials that reflect the culture or ethnicity of its students.

Note: Cells are empty if there are less than 5 respondents.

Table A7.7

Staff Examine Their Cultural Biases

	All %
Strongly agree	13
Agree	50
Disagree	34
Strongly disagree	3

Question A.22: This school has staff examine their own cultural biases through professional development or other processes.

Note: Cells are empty if there are less than 5 respondents.

Instructional Equity

Table A7.8

Closing the Achievement Gap is a High Priority

	All %
Strongly agree	16
Agree	44
Disagree	38
Strongly disagree	3

Question A.23: This school considers closing the racial/ethnic achievement gap a high priority.

Note: Cells are empty if there are less than 5 respondents.

Table A7.9

Encourages Equity in Rigorous Course Enrollment

	All %
Strongly agree	61
Agree	36
Disagree	3
Strongly disagree	0

Question A.20: This school encourages students to enroll in rigorous courses (such as honors and AP), regardless of their race, ethnicity, or nationality.

Note: Cells are empty if there are less than 5 respondents.

Table A7.10

Support Provided for Teaching Culturally and Linguistically Diverse Students

	All %
Strongly agree	19
Agree	68
Disagree	10
Strongly disagree	3

Question A.45: This school provides the supports needed for teaching culturally and linguistically diverse students.

Note: Cells are empty if there are less than 5 respondents.

8. Learning Readiness and Engagement

Table A8.1

Summary of Indicators for Student Learning Readiness and Engagement

	All %	Table
Students at this school are motivated to learn [†]	3	A8.2
This school motivates students to learn [†]	33	A8.3
Disruptive behavior is a problem at this school [‡]	39	A8.5
Cutting classes or being truant is a problem at this school [‡]	21	A8.4
Lack of respect of staff by students is a problem at this school [‡]	17	A8.6

Notes: Cells are empty if there are less than 5 respondents.

[†]Percent Responding “Strongly Agree.”

[‡]Percent Responding “Moderate problem” or “Severe problem.”

Learning Motivation and Truancy
