Vote________________________________________

**Background:**
The Single School Plan for Student Achievement (SPSA) is a blueprint to improve the academic performance of all students to the level of the performance goals, including both the Academic Performance Index (API) and the Adequate Yearly Progress (AYP) measures. The purpose of the SPSA is to coordinate all educational services at the school. The SPSA will be used to improve the academic performance of all pupils to the level of the performance goals, as established by the API. It serves to facilitate the school's improvement process. The plan should be developed with a deeper understanding of root causes of student academic
challenges and identify and implement research-based instructional strategies to raise the achievement of students who are not yet proficient at state standards.

Additionally as per California Education Code section 64001, schools are required to use the School Site Council to develop the Single School Plan. The Site Council must approve the plan, recommend it to the local governing board for approval, monitor its implementation, and evaluate the effectiveness of the planned activities at least annually.
